

Commercial Proposal Softphone

Quote No: 112 **Date:** 13/06/2026 **Prepared by:** Hussain Umaini

Hi Team,

We are delighted to offer you our Cloud communications services which help large businesses streamline and bring efficiency to their voice communication.

We follow a “prepaid costing model” or “pay as you go model”

You are required to make an upfront payment of \$500. The following components will be subtracted from the main balance of \$500 i.e. account rental, user rental, virtual number rental, call charges.

(P.S: The charges mentioned are in USD. Also, \$1=1 credit)

Plan	Custom
Prepaid cost	\$500 + 18% GST
User Access	\$15 per agent
US Landline virtual number rental	\$15 per number per month(1Number X \$15= \$15)
Total Rental	Number of user + no of US number
Credits available in your Exotel account	\$500 - Total rental (every month)
Outbound call charges (Double leg call charges would be applicable, check note (1) for more details on call leg)	a) IP Outbound calls using a US virtual number when the agent is in India:\$0.2
Incoming	a) IP Free

NOTE:

1. Outbound call/Agent connecting with client - Double leg call charges applicable. The Virtual number dials 2 numbers here, the virtual number dials to the agent's number and then the customer leg is dialed. Here the second leg gets initiated only if the 1st leg, i.e agent's leg, is successful. The billing is done for the successful leg. In case the 2nd leg is not successful or not answered, you will still be charged for the 1st leg.
2. Incoming calls - Single leg call charges are applicable.
3. The call rates are country/code specific and can vary accordingly. For eg. The UK (+44) code is charged as \$0.832 per min and this can be different for other UK codes. Please find the attached rate card for code-specific rates.
4. The international call rates are somewhat volatile depending upon various external factors and may change/revise once in a quarter.
5. We follow a no refund policy. Check this article for further details- [payment terms and conditions](#).
